IN.FORM - COMPETITIVE ADVANTAGE

When compared to published studies on many popular, brand-name weight loss programs, the IN.FORM program outperformed EVERY ONE in several key bi-omarker indicators including:

Increased weight loss between 44% - 123%. Increased fat loss between 15% - 233%. Greater improvements in triglycerides, total cholesterol and LDL cholesterol.

GREATER RESULTS

Comparison based on a range of reported data published by commercial weight loss programs in the U.S. Study participants experienced greater results with IN.FORM supplements than with diet alone. At the end of 90 days, the median weight loss for those who received IN.FORM products was 26 pounds of body weight and 17 pounds of fat!!

WHAT IN.FORM WILL DO FOR YOU:

The remarkable, measurable results of IN.FORM are directly linked to the combined, synergistic effects of the product protocol. Each product serves a specific purpose that contributes to the program and any other combination of products would, in fact, not result in the same effects. When used as a complete system combined with the recommended healthy diet and exercise plan, the IN.FORM program:

Supports gut health to combat endotoxins which can interfere with gut performance and glucose metabolism. Helps support repopulation and optimization of beneficial bacteria in the gut. Helps to promote muscle recovery and enhance the buildup of lean muscle mass. Maintains healthy blood pressure. Supports healthy insulin response. For more information contact me at:
