LOST: BABY JESUS

Our Baby Jesus was taken from the Nativity scene in our front yard during the night of December 27-28th. Two young girls were seen in the area about 12:30 A.M. that night and took off running when they realized they were seen. If anyone has seen a Baby Jesus lying Somewhere with no home, it's probably ours. You can return it to 611 Manitowoc Street with no question asked - just put on front porch. We can only say to the thieves - what Jesus said the day He died - "Father forgive them, they know not what they do."

Wishing everyone a Happy, Healthy and Prosperous New Year.

Zion Methodist Reedsville Begins 100th Year Celebration!

Sunday, January 29th marks the beginning of the 100th year celebration at the Zion United Methodist Church in Reedsville.

The first organizational meeting for the "little church on the corner" of Reedsville's main street took place on May 8th, 1912.

Rev. W.A. Detert was the chairman.

Elected officers at the meeting included A.B. Reichert, L.A. Busse, and Albert Fischer.

After approval by the conference in June, actual construction of the building began in late summer of 1912 at a cost of \$4,000 which was raised by faithful worshipers whose families continue to actively support the church today.

Former pastors and past members have been invited to attend the 100th Anniversary Celebration of the Zion Methodist Church on Sunday, April 29th at 9 a.m.

A family style dinner will follow at Cobblestone, Brillion, at 11:30 a.m.

There will be displays of church memorabilia, confirmation pictures dating from 1915 - 1995, as well as photo albums documenting church history.

Special Sundays with guest speakers:

January 29th Merlin Hoeft

February 12th Jim Barnes

March 25th Karl Goodfellow

A coffee hour and fellowship will follow each service.

Anyone interested in attending the April 29th dinner can call 920-754-4087 or 920-323-3112.

Asthma is not just for kids

Asthma symptoms can start at any age. Approximately one in 12 adults are diagnosed with the disease.

Asthma is a serious, chronic disease that affects the lungs and narrows the airways that deliver air to the lungs.

Although symptoms of asthma sometimes vary, telltale signs usually include tightness in the chest, a persistent, irritable cough, wheezing, and shortness of breath or feeling like your lungs are "bloated."

Asthma causes symptoms when the bronchial tubes become narrowed. An asthma "attack" begins when the airways become inflamed in response to a trigger, such as pollen, dust, animal dander, mold, exercise, cold air, smoke or other illnesses. When the airway becomes tight, it is hard to get air to pass in and out of your lungs and you continue to have a harder time breathing with each breath attempt.

Asthma attacks can be mild, moderate or severe. Depending on the severity of the disease, treatment options include the use of anti-inflammatory medications, steroids, bronchodilators and inhalers.

To help control the disease:

- Eliminate household pets, if necessary.
- Vacuum / dust regularly.
- Replace carpeting with wood or tile floors, especially in bedrooms.
- Cover bedding and pillows with airtight, hypo-allergenic covers.
- Cover your nose and mouth with a scarf or mask in cold air.
- Avoid direct contact when people are coughing or ill.
- Use your maintenance inhalers as prescribed by your health care provider.

Asthma can be controlled. However, this requires being well educated about the disease and being an active partner in managing it.

The Circulatory System - Did you know?

An estimated 81 million Americans have one or more forms of cardiovascular disease. Cardiovascular disease and stroke (both largely preventable) cost the United States approximately \$503 billion in 2010. How does this vast system work? The body's cells require a continuous supply of food and oxygen. At the same time, carbon dioxide and other waste materials produced by the cells must be picked up for removal from the body. Enter the circulatory system....a vast network of 60,000 miles of blood vessels, powered by a muscular heart that orchestrates this essential work. The smallest of these vessels, our capillaries, are only one cell thick, which enables the interchange of water, oxygen, carbon dioxide, nutrients and waste products from the blood and surrounding tissues.

So what can we do? You guessed it...

LIFESYLE CHANGES FOR HEART HEALTH

Do what you can to maintain a healthy weight. Consume fresh fruits (especially those containing polyphenols--pomegranates, blueberries, raspberries, green tea), vegetables, onions and garlic.

Eat cold-water fish. Drink more water and eat more fiber.

Exercise regularly: make sure you get aerobic exercise (walking).

Get sufficient sleep. Stop smoking. Lower your stress.

And to support the cardiovascular system Nature's Sunshine has a Circulatory Pack which includes Super Omega-EPA, Ginkgo and Hawthorn Combination, and CoQ10-50 mg. which is in convenient packets. February special - Circulatory Pack - 25% off the retail price
