A Message from the Village President

Hello everyone,
It is budget time for the village board. The board and village employees are working towards implementing a budget that continues to provide that same services we have in the past. There is more that the board would like to do however our funds do not allow us to. We are looking for help. During a recent inspection of park equipment at Bubolz Memorial Village Park it has been decided that the playground equipment is original and in need of replacement. The main item that needs replacing is the old wooden play structure. The board is asking if any individuals or businesses would be interested in helping the board to fund the replacement of this structure. If you attend baseball games at the park or look at the park during evenings you will find this structure is used very much by the young children. If you feel you would like to contribute to the replacement of this structure you can call me at 1-920-325-4650 or the village hall at 754-4371. Thank you for your consideration as we look to maintain and improve all that we love about our village.
Thank you- Village President-Andrew Bubolz

HAPPY THANKSGIVING!

Orthopedic & Spine Therapy

Orthopedic & Spine Therapy (OST) of Brillion is proud to announce that they have hired **Linea Rochford, DPT** as a full-time physical therapist. Linea graduated from Hesston College in Hesston, KS 2006-2008 and received her A.S., Health & Medical Occupations. From there she received her B.S., Integrative Physiology and then her Doctorate in Physical Therapy from the University of Iowa in Iowa City, IA. She is a member of the American Physical Therapy Association (APTA) and the Wisconsin Physical Therapy Association (WPTA).

Linea's first exposure to physical therapy was as a patient herself! She played volleyball in high school and in college and received physical therapy for some minor injuries. From there she decided she would like to give people the opportunity to take an active role in their treatment by becoming a physical therapist someday. After graduation she worked in acute care at the University of Minnesota Medical Center. She enjoys working with a variety of patients and would like to pursue her education in women's health in the future.

OST has proudly been serving Wisconsin for over 20 years, and specializes in outpatient manual physical therapy. With 16 locations and 5 divisions of care, we are large enough to meet your needs, yet small enough to ensure that you see the same physical therapist at every appointment. We accept all insurance plans, and offer free screenings at any one of our clinics.

Linea is currently accepting new patients. To schedule your appointment, please call her at our Brillion location (920-756-9340). For more information about Linea, visit www.ostpt.com.

FOLIC ACID (VITAMIN B 9)

This information is from the book *Drugs & Nutrient Depletion* by Clell M. Fowles, Pharmacist and the *Natural Health Manual*. Folic acid is an absolutely essential nutrient which plays many roles in our bodily functions. It is necessary for production and maintenance of new cells, protects the DNA, important for bone marrow to produce blood cells, health of the intestinal tract and during pregnancy for the growth and safety of the baby. Deficiency of this nutrient has been shown to cause birth defects, cervical dysplasia, anemia, headache, fatigue, anorexia, insomnia, nausea, decreased immune function, hair loss and elevated levels of homocysteine (which is associated with a greater risk of heart disease).

MEDICATIONS THAT DEplete FOLIC ACID

Anti-inflammatory drugs, seizure medication, oral contraceptives, reflux medication, steroids, diuretics, antibiotics, chemotherapy, barbiturates, parasite medication, diabetes medication, cholesterol medication, ulcer medication, & antacids.

TOP FOOD SOURCES OF FOLIC ACID

1/2 cup lentils = 180 mcg.

1/2 cup pinto beans = 150 mcg.

1/2 cup asparagus = 140 mcg.

Are you and your family getting 400 mcg of folic acid every day?

What you should know about the flu

Influenza can be a potentially fatal illness, especially in those who may have other chronic illnesses, a weak immune system or are very young or very old. Influenza is not the stomach flu. According to the Centers for Disease Control (CDC), the single best way to protect against the flu is to get vaccinated each fall. Since the seasonal flu virus changes from year to year, it's important to get vaccinated for each new strain. So, even if you were vaccinated last year, you still need a new vaccination for this season's virus. You cannot get the flu (influenza) as it is not a live vaccine. It is possible to have a reaction to the vaccine, but we ask questions to minimize your risk. As we give flu shots in the fall and early winter, there are a lot of viruses being spread at that time of the year you could get. It may not be influenza, so if you are feeling bad, we can see you and possibly test you for influenza if suspected. The common symptoms of the flu include:

- Fever over 101
- Chills
- Cough
- Sore throat
- Runny, stuffy nose
- Body aches
- Headache
- Fatigue

If you do become ill, please don't share your germs with others. The CDC recommends staying home and limiting contact with others to keep from infecting them. In addition to receiving the vaccine, these steps can help stop the spread of flu:

- Stay healthy - get plenty of rest, eat a well-balanced diet and exercise regularly
- Avoid close contact with people who are sick
- Cover your mouth and nose with a tissue when coughing or sneezing
- Avoid touching your eyes, nose or mouth; germs spread this way
- Wash your hands often, especially after you cough or sneeze. If soap and water are not available, use an alcohol-based gel.
