VOLUNTEER AT SUNRISE HORSE FARM

Why do people volunteer here? Well I asked two of our volunteers and this is what they said:

Samantha said, " I like to volunteer out at Sunrise Horse Farm because it helps Mary Ellen out. I love being around the animals. It's a very peaceful place to be when you are depressed or stressed". Samantha started coming out here as a student in Two Rivers in 2010 and after graduation became a volunteer. She is very responsible and completes the chores as needed.

Josh said, " I like volunteering at Sunrise Horse Farm because it is peaceful and relaxing but also fun to work with the horses". Josh started coming out here as a student in Two Rivers in 2009 and after graduation became a volunteer. During my times away on mission trips both Samantha and Josh do the chores and I can go knowing that everything will be taken care of.

We are into the summer schedule now and require more volunteers. Please check your schedule and contact us either by phone or email. Thank you for whatever you can do to volunteer and make a difference in the life of someone.

SILVER SHIELD RESCUE GEL and SILVER SHIELD LIQUID Silver Shield Rescue Gel provides 24 parts-per-million of pure silver nanoparticles and is designed for use in moist wound care management to help prevent the growth of infectious microorganisms. It can be used for minor cuts, abrasions, lacerations, skin irritations and 1st and 2nd degree burns. Research into the use of silver for medical and other purposes has led to the development of silver nanoparticles which exhibit strong antimicrobial activity and have been shown to be non-toxic and virtually free of adverse effects. Advanced technology has enabled silver nanoparticles to be incorporated into antimicrobial medical and dental device coatings, stents, catheters, wound dressings, bone prostheses, cardiac devices and surgical appliances to reduce hospital acquired infection rates. Numerous studies have confirmed the potent antibacterial, antifungal and antiviral activity of silver nanoparticles, even against proven resistant strains such as MRSA, Pseudomonas aeruginosa, Escherichia coli and erythromycin-resistant Streptococcus pyogenes. Recent studies have shown that silver nanoparticles demonstrate broad-spectrum antiviral activity against influenza A virus, HIV, hepatitis B, herpes simplex virus type 2, respiratory infections/pneumonia typically in infants/children, adenovirus type 3 and vaccinia virus in vitro. Silver nanoparticles have exhibited significant antifungal activity against ear infections and lung diseases, nail and skin infections, and yeast infections, and thrush. A study comparing the effects of silver nanoparticles against amoxicillin and metronidazole in an animal model found that wounds treated with silver nanoparticles completely healed an average of 3 days faster than those treated with antibiotics.
